

<b>UTC Project Information</b>	
Project Title	Transit Performance Measures in California (Former title: Performance Measurement and Transit Data)
University	San José State University Mineta National Transit Research Consortium
Principal Investigator	Caroline Rodier, Ph.D.
PI Contact Information	Mineta Transportation Institute Research Associate 210 N. Fourth St., 4 <sup>th</sup> Floor San Jose, CA 95112 cjudier@ucdavis.edu 916-541-4628
Funding Source(s) and Amounts Provided (by each agency or organization)	Research and Innovative Technology Administration University Transportation Centers Program (\$29,057.50)  California Department of Transportation Office of Research—MS42 (\$29,057.50)
Total Project Cost	\$58,115
Agency ID or Contract Number	DTRT12-G-UTC21
Start and End Dates	August 2013 – April 2016
Brief Description of Research Project	<p>This proposed research responds to the following problem as identified by Caltrans in the 2013-2014 Mineta Transportation Requests for Proposals:</p> <p style="padding-left: 40px;">Transit is a vital mode of travel that must be integrated in all of Caltrans' activities to support the development of a robust multimodal transportation system, increase mobility options for the public, and maintain a world class transportation system. Unfortunately, Caltrans has constantly struggled with fully integrating transit into existing processes and activities and one reason is a lack of accurate transit data. Accurate data is necessary to ensure transit is fully incorporated into plans, projects, and performance measures. The department needs to identify what performance measures related to transit, specifically interregional trips, need to be captured.</p> <p>To address this problem, we will (1) clarify Caltrans' objectives with respect to transit performance measures; (2) help Caltrans identify the transit performance measures that will best assist Caltrans in meeting those objectives; (3) identify and evaluate the suitability of observed and modeled transit data currently available to Caltrans; (4) demonstrate how to implement transit performance measures that can be developed with currently available data; and (5) develop a plan that articulates the steps</p>

	<p>and resources necessary to integrate data from intelligent transportation systems that is increasingly becoming part of California's transit operation systems.</p>
<p>Describe Implementation of Research Outcomes (or why not implemented)</p>	<p>Research in progress.</p>
<p>Place Any Photos Here</p>	
<p>Impacts/Benefits of Implementation (actual, not anticipated)</p>
