

UTC Project Information	
Project Title	Funding Resilient Infrastructure in New Jersey: Attitudes Following a Natural Disaster (Former title: Behavioral Analysis of the Impacts of Hurricane Sandy in New Jersey)
University	Rutgers University Mineta National Transit Research Consortium
Principal Investigator	Robert Noland, Ph.D.
PI Contact Information	Alan M. Voorhees Transportation Center Civic Square Building 33 Livingston Avenue New Brunswick, NJ 08901 rnoland@rutgers.edu
Funding Source(s) and Amounts Provided (by each agency or organization)	Research and Innovative Technology Administration University Transportation Centers Program (\$51,975)
Total Project Cost	\$51,975
Agency ID or Contract Number	DTRT12-G-UTC21
Start and End Dates	December 2013 – February 2016
Brief Description of Research Project	This research examines public attitudes towards revenue sources that can be dedicated to protecting vulnerable areas, most notably the transportation linkages on which the state depends. A statewide survey was conducted to gather data about four months following Superstorm Sandy, the costliest natural disaster in the state's history. Our objective was to sample public attitudes while the impacts of the disaster were still fresh. Attitudes to various revenue raising policies including a gasoline tax were examined and linked to attitudes towards the need to invest in infrastructure. We found little support for temporary tax increases to improve resiliency, with the most positive support for taxing visitors (i.e., a hotel and recreational tax) and for a 30-year bond measure (i.e., taxing the future). This observation seemingly contradicts broad support for investing in new infrastructure, as well as maintaining and protecting existing infrastructure. Those who supported investment in transit and protecting infrastructure also were more likely to support these taxes. There was no parallel finding of factors associated with taxing visitors or issuing bonds.

<p>Describe Implementation of Research Outcomes (or why not implemented)</p>	<p>Research report has been submitted for review.</p> <p>Noland, Robert B., Marc D. Weiner, and Michael R. Greenberg. (2015). "Funding Resilient Infrastructure in New Jersey: Attitudes Following a Natural Disaster." Submitted to the Annual Meeting of the Transportation Research Board and for publication in Transport Policy.</p> <p>Noland, Robert B. "Funding Resilient Infrastructure in New Jersey: Attitudes Following a Natural Disaster." Presentation at the 95th Annual Meeting of the Transportation Research Board, Washington, DC, January 10-14, 2016.</p> <p>This project was originally entitled: "Behavioral Analysis of the Impacts of Hurricane Sandy in New Jersey" with the objective of exploring evacuation behavior of residents following Hurricane Sandy, specifically experiences with regard to transit disruption; attitudes, interests, and preferences with regard to New Jersey shore redevelopment in terms of infrastructure, housing, and financing. The majority of project funding was a contribution to a state-wide survey conducted four months after Sandy devastated the New Jersey shore.</p> <p>The scope was scaled back when our initial data analysis found little variation in evacuation behavior of respondents from our survey, thus we focused on attitudes to infrastructure and its financing in our analysis. The title was thus changed to: "Funding Resilient Infrastructure in New Jersey: Attitudes Following a Natural Disaster" which better reflects the scope of the work completed.</p>
