

Ride On Ride Safe— E-Bike Style!

MTI Essay Contest

Ride On, Ride Safe—E-Bike Style! (Grades 6-12)

In recent years, more tweens and teens are riding electric bicycles (e-bikes), bringing both big benefits and serious safety questions. E-bikes offer kids independence, exercise, and a more sustainable, cheaper alternative to traveling by car. But hospitals are seeing more and more kids injured while riding e-bikes, and there are concerns about reckless riding that put riders, pedestrians, and even motor vehicle drivers at risk.

These concerns have led many communities to ask if there should be more limits on how kids ride e-bikes and about whether schools should teach kids safe riding skills.

Four Winners will be Selected

Two from grades 6-9 and two from grades 10-12

Grades 6-9

Grades 10-12

**CAN YOU HELP RAISE
AWARENESS ABOUT
E-BIKE SAFETY?**
