

Celebrating Black History Month and Inventor Garrett A. Morgan

February 2021

In honor of #BlackHistoryMonth, join us as we celebrate the inventor, entrepreneur, and hero Garrett A. Morgan by participating in the [Garrett Morgan Sustainable Transportation Competition!](#) With inventions like the three-way stop sign and the gas mask, the Garrett Morgan program seeks to capture his innovative and resolute spirit. This competition is open to middle school students from across the country and introduces students to the exciting world of transportation with an emphasis in STEM. With a \$1000 grand prize on the line and a host of resources to impress the judges, students will explore transportation issues before presenting a potential solution to one of the problems in a 7-10 minute video.

Learn more about this competition and Garrett Morgan at <https://transweb.sjsu.edu/workforce-development/garrett-morgan-program>.
