Electrifying Transit: Zero-Emission Buses in the U.S.

As the U.S. public transportation sector charges ahead into a zero-emission future, major challenges leave agencies and transit bus manufacturers facing uncertainty. Join Leah Foecke and Zachary Karson of global infrastructure advisory firm Rebel Group and authors of a recent [MTI publication](#) to explore obstacles and insights in the US transit bus market. The discussion will focus on key industry dynamics, financial challenges with zero-emission bus (ZEB) acquisition, technological barriers in deployment, and regulatory issues.

Don't miss the opportunity to hear insights on this rapidly evolving market easing transit into a more sustainable future!
