San José State University Lucas Graduate School of Business Master of Science in Transportation Management MTM 250: Sustainable and Resilient Transportation Fall-A 2023

Course and Instructor Contact Information

Instructor:	David Abraham, PhD
Email:	david.abraham@sjsu.edu (preferred method of contact)
Office Hours:	Tuesdays 3:30-5:00 PM or by appointment
Class Day/	Thursdays 5:30-9:30 PM, on 7/27, 8/3, 8/10, 8/17, 8/24, 8/31, 9/7, 9/14, 9/21, 9/28
Time:	Online (Zoom)
Classroom:	Canvas (<u>http://sjsu.instructure.com</u>)
Course makeiter	

Course website:

Course Format

Students must have regular access to email and the internet in order to communicate with the instructor, submit assignments, and engage in other class activities.

Students attend class sessions online using Zoom, SJSU's online meeting application. During classes, students should:

- Be in a quiet room without distractions (e.g., no family members or colleagues walking through or asking questions)

- Have stable internet access
- Use a video camera and good quality microphone so that you are seen as well as heard
- Follow good "meeting etiquette" principles (one such list: <u>https://blog.gotomeeting.com/7-rules-virtual-meeting-etiquette-every-professional-know/</u>)

Plan to join at least ten minutes before 5:30 pm, to make sure you are ready when class begins. (The very first time you join from a computer or device, allow extra time for set-up.)

The university has many useful tutorials on how to use Zoom here: <u>How to access Zoom for students | Learn Anywhere</u> (sjsu.edu)

For more information, contact the MSTM Program Coordinator, Amir Gillani, at Amir.Gillani@sjsu.edu.

Last update: 08/14/2023

Course Description

Analysis of the multidimensional relationship between transportation systems and major environmental problems such as climate change, air pollution, noise, diminished water and soil quality, and decreased biodiversity. Exploration of innovative strategies to achieve sustainable and resilient transportation systems, such as zero-emission and other new vehicle technologies, climate resilience and adaptation plans, habitat conservation plans, principles of climate justice, and environmental impact assessment and monitoring. Case studies from across the globe that examine the interplay between sustainable management practices and technological, political, and societal factors.

MSTM Program Learning Goals:

(Note: Not all program learning goals are covered in every course)

- **Goal 1: Transportation Systems and Society:** Craft management decisions that integrate knowledge of multimodal transportation, social, and, environmental systems
- **Goal 2:** Innovation: Develop innovative solutions to transportation management challenges
- Goal 3: Leadership: Develop high-impact leadership styles and competencies (traits, skills, behaviors)
- Goal 4: Communications: Communicate effectively with a diverse workforce and citizenry
- **Goal 5:** Analytical skills: Identify and evaluate transportation management issues using appropriate data and methods

Course Learning Outcomes

Upon successful completion of this course, students will be able to:

- 1. Describe the multi-dimensional relationships between transportation, sustainability, resilience and the environment.
- 2. Understand the environmental impacts of transportation modes, the infrastructure over which they operate and the social, economic and environmental impacts.
- 3. Describe the interplay between technological, political, economic and societal factors impacting the location and function of transportation.
- 4. Analyze and/or develop policy and programmatic interventions to address opportunities and constraints of transportation functions (e.g. air pollution, greenhouse gas emissions, noise, diminished water and soil quality, decreased biodiversity, land take, etc.)
- 5. Collect, analyze and describe data from various sources to develop and assess sustainable transportation solutions.
- 6. Develop a context-sensitive plan for implementation, monitoring and evaluation of sustainable transportation management solutions.
- 7. Communicate sustainable transportation planning and management strategies with the help of clear, accurate and compelling text and graphics in documents and oral presentations.
- 8. Develop and utilize leadership and teamwork skills by effective participation in group assignments and activities.

Required Texts/Readings

Textbooks

Course readings include several chapters from the following two books:

Required:

1) Tumlin, Jeffrey. 2012. Sustainable Transportation Planning: Tools for Creating Vibrant, Healthy, and Resilient Communities. New York: John Wiley & Sons, Incorporated. (ISBN 1-118-12762-5. SJSU Library offers online access to this book for free).

2) Rodrigue, Jean-Paul. *The Geography of Transport Systems*, 5th *Edition*. Routledge. 2020. (ISBN 978-0-367-36463-2. (The full text is available online for free - <u>https://transportgeography.org/contents/</u>)

Additional readings from academic journals, agency reports and other sources may also be used to supplement the course books. Further details will be communicated with the students through e-mail and/or Canvas.

Library Liaison

The Library Liaison for the Lucas Graduate School of Business is Christa Bailey (christa.bailey@sjsu.edu).

Course Requirements and Assignments

This course involves three major types of graded activities:

A) the group term paper that is developed through several steps during the semester (including project proposal, exploring and analyzing relevant data, and developing a sustainable transportation plan and management strategies)

B) the global case studies that involve selection of one or more city/region(s) with innovative sustainable transportation programs or policies, writing a summary report, and presenting findings in class; and

C) online class and discussion participation and engagement that requires you to respond to questions about reading materials and/or ask thoughtful questions. Your grade for the course will be based on the following assignments and other graded activities:

Assignments and Other Graded Activities	Due Date(s)	Percent of Course Grade	Course Learning Objectives Covered
Quiz: Sustainability Development	August 10	10%	1,3
Assignment 1: Paper – Sustainability and Sustainable Transportation	August 17	10%	1,3
Assignment 2: Sustainability impact assessment scoping	August 24	10%	1,2, 3
Assignment 3: Project Proposal and scoping for impact assessment	August 31	5%	1,2,3,6
Assignment 4: Global Best Practices paper	August 31	15%	2,3,4,5
Assignment 5: Active Transportation Planning paper	September 7	10%	2,4,6
Assignment 6a: Sustainable Transportation Plans and Management Strategies	September 14	15%	1, 2, 3, 4, 5, 6, 7, 8
Assignment 6b: Sustainable Transportation Plans and Management Strategies	September 28	25%	1, 2, 3, 4, 5, 6, 7, 8

Additional details on each assignment will be communicated with the students through Canvas, and/or e-mail.

Grading Information

The course grade consists of seven items (i.e. assignments and graded activities) as listed in the table above. For example, "Assignment 2 – Sustainability impact assessment" is 5% of the final grade, and "Global best practices paper" is 15% of the final grade. This means that "Assignment 2" is worth 5 points toward your final grade, and "Global best practices paper" is worth 15 points. I add the points for each assignment or graded activity to arrive at the final score for the course. For Quiz 1, I convert the number of items to a 10-point scale. Then, I use the following grading scheme to convert the final total score into a letter grade:

A+ (96 and above); A (93 to 95); A- (90 to 92); B+ (87 to 89); B (84 to 86); B- (81 to 83); C+ (78 to 80); C (75 to 77); C- (72 to 74); D+ (69 to 71); D (66 to 68); D- (63 to 65); F (below 63)

Other Grading and Assignment Issues

Students are expected to submit all assignments on the specified due dates by email (David.Abraham@sjsu.edu). Late assignments will be accepted but the score will be reduced 10% for missing the due date, and 5% for each day delayed afterwards. Missed assignments will result in a score of zero. Students who turn assignments in on time will normally receive comments from me and (if applicable) their peers within 7-10 days. For late papers, the turnaround time may well take fourteen or more business days, and these students may lose the opportunity to receive feedback from their peers.

Classroom Protocol for the Lucas College Graduate School of Business

http://www.sjsu.edu/cob/Students/policies/index.html

Other Classroom Rules

Students are expected to attend every Zoom meeting with their cameras turned on unless necessary based on individual discretion. Students have a responsibility to show respect to fellow classmates during the Zoom meetings and group assignments. To do so, please:

- Avoid interrupting other speakers and listen to the ideas of others with respect during class and group activities.
- Do not use electronic devices for purposes not relevant to the class and/or when it is distracting to others or keeps you from being engaged in class.
- Balance the workload among team members equitably in a way that allows the team to effectively utilize the strengths of each team member.
- Develop a common understanding of goals and steps required to achieve those goals for group activities.
- Develop effective communication and time management strategies suitable for your group assignments.

Class and Online Discussion Participation Guidelines

You are expected to have carefully read and thoroughly thought about the assigned readings BEFORE each class session and/or BEFORE responding to relevant discussion board activities. Failure to read the assigned chapter(s) and/or article(s) will seriously hinder your ability to engage in class or online discussions and/or activities impacting your participation points and final grade. I encourage you to take notes while reading assigned materials.

Please note that you may be randomly selected to answer a question about the readings or apply your knowledge gained through readings to a group activity or an in-class exercise. Your presence means that you are ready to engage in these class activities.

University Policies

Per <u>University Policy S16-9</u>, relevant university policy concerning all courses, such as student responsibilities, academic integrity, accommodations, dropping and adding, consent for recording of class, etc. and available student services (e.g. learning assistance, counseling, and other resources) are listed on this <u>Syllabus Information web page</u>. Make sure to visit this page to review and be aware of these university policies and resources.

Course Schedule

Note: This schedule is subject to change with fair notice. Check your email and Canvas frequently for any changes to this schedule.

Week	Date	Subject	Readings	Assignments
Part I:	Unders	tanding Sustainable Development	nt, Transportation impacts to the	environment and Climate
1	July. 27	Introduction, Sustainable Development Synergies Pt.1,2 – Introductions and Sustainable development professional discipline specific Opportunities & Constraints Pt.3 – Course Overview Pt.4 – Exercise	 Course Syllabus Steady State Economy; Our Common Future (PDF handouts) 	
2	Aug. 03	Sustainable Development Foundations Pt.1 – Where are we? Pt.2 - What is Sustainable Development? Pt.3 – Discussion: What does it mean. Pt.4 – Group Exercise	 Steady State Economy; Our Common Future (PDF handouts) Tumlin Chpt 1 	Quiz 1
3	Aug. 10	Sustainable Development/ Sustainable Transportation Pt.1 – Where are we? Pt.2 - What is Sustainable Transportation? Pt.3 – Discussion: What does it mean. Pt.4 – Group Exercise	 Tumlin Chpt 2 Video - <u>https://www.youtube.com/w</u> <u>atch?v=A9iRBVEU72c</u> GSDR Report 2019 Pp 1-24 Litman 2022, Pp. 1-12 	Assignment 1 - Sustainability and Sustainable Transportation
4	Aug. 17	Transportation Impacts: Health/ Environment/ Climate/ Resilience Pt.1 – Impacts Review Pt.2 – Future Technologies Pt.3 – Discussion: Impacts/ Technology/ Public Policy Pt.4 – Group Exercise	 Tumlin Chpts 3, 4 Rodrigue Chpt 4 	Guest Speaker Sarah Kay, ICF Assignment2 - Sustainability Impact Assessment
Part II:	Transp	oortation systems & modes		
5	Aug. 24	Streets/ Resilience; Parking/ Climate Pt.1 – Streets/ Resilience Pt.2 – Parking/ Climate Pt.3 – Discussion: Economics vs Environment Pt.4 – Exercise	 Tumlin Chpt 5,10 Rodrigue Chpt 4.4 Case Studies: TxDOT REAL; FSX; Hyperloop; Autonomous Vehicles 	Guest Speaker Kristi Wamstad, ISI Assignment 3 – Visioning Sustainability Futures and Public Policy Assignment 4 –
				Global Case studies

6	Aug.	Pedestrians/ Bicycles	-	Tumlin Chpt 6,7	Assignment 5 –
	31	Pt.1 – Pedestrians			Active
		Pt.2 – Bicycles			Transportation
		Pt.3 - What does it mean.			Planning
		Pt.4 – Group Exercise			C
7	Sept.	EVs Planning and Policy			Guest Speakers
	07	Pt.1 Sustainability Futures/			Therese McMillan,
		Smart Vehicles/ Policy			Dave Vautin, MTC
8	Sept.	Transit/ Motor Vehicles	-	Tumlin Chpt 8,9	Guest Speaker
	14	Pt.1 – Transit Modes/ Planning		1	Richard Ezike, Joint Office
		Pt.2 – Motor Vehicles			E&T
		Pt.3 – Discussion: Performance			Group Exercise: Plan
		Measurement			structure to synthesize/
		Pt.4 – Group Exercise			finalize term report
9	Sept. 21	Sustainable Transportation Planning & Management	-	Tumlin Chpt 12,13,14	Guest Speakers Edward Thomas, Joel
