SOUTHERN COLORADO TRANSPORTATION CONFERENCE 2024

Southern Colorado Institute of Transportation
Technology (SCITT)

Colorado State University Pueblo's Occhiato
Student Center (OSC) Ballroom

October 24, 2024

Research indicates the results of multi-hazard exposure and risk to rail infrastructure could be catastrophic. Delays from temperature alone could cost \$45 to \$60 billion by 2100. Approximately 27% of all global road and railway assets are exposed to at least one hazard annually and 7.5% are exposed to 1/100 year flood event.

Join transportation professionals and researchers for the Southern Colorado Transportation Conference (SCTC) 2024 to explore this urgent issue with this year's theme: Climate Resiliency for Railroad Infrastructure.

FEATURED SPEAKERS

Shane Ferguson

Director, Region 2,
Colorado Department
of Transportation

Dr. Maryam Allahyar

Director, Research &
Development, Federal
Railroad Administration
