

Traffic Control Devices - Quiz

1. What is the primary purpose of traffic control devices (TCDs)?
 - A. To increase vehicle speeds on roadways
 - B. To promote highway safety and efficient movement of all road users
 - C. To reduce construction costs
 - D. To standardize vehicle design
2. Which of the following is NOT a main category of traffic control devices?
 - A. Traffic signs
 - B. Traffic signals
 - C. Pavement markings
 - D. Roadway lighting
3. According to MUTCD principles, which characteristic is essential for all traffic control devices?
 - A. Decorative design
 - B. Convey a clear and simple meaning
 - C. Use of bright colors
 - D. Digital integration
4. Which color is primarily used in the MUTCD to indicate temporary traffic control, such as construction zones?
 - A. Yellow
 - B. Orange
 - C. Red
 - D. Blue
5. A STOP sign is best classified as which type of traffic sign?
 - A. Warning
 - B. Guide
 - C. Regulatory
 - D. Informational
6. What does a broken white line in pavement markings typically indicate?
 - A. Passing is prohibited
 - B. Maximum restrictions apply
 - C. A permissive movement
 - D. Lane closure ahead

7. Which traffic sign color is typically associated with guidance and direction information for road users?

- A. Red
- B. Yellow
- C. Brown
- D. Purple

8. Which MUTCD design principle refers to distributing information over a distance rather than presenting it all at once?

- A. Primacy
- B. Codity
- C. Redundancy
- D. Spreadity

9. Which type of traffic signals could be used for pedestrian movement?

- A. Traffic control signals
- B. Pedestrian signals
- C. Flashing beacons
- D. All the above

10. Which colored pavement marking is used to enhance areas where bicyclists are expected to operate?

- A. Yellow
- B. Red
- C. Green
- D. Purple
