The German Case: Rail Stations to Connect the World

TOBIAS KEYL

Associate Partner
Gerkan, Marg & Partners (gmp)

Get ready for the latest installment of our *On the Right Track* series featuring Tobias Keyl from the globally acclaimed architecture firm Gerkan, Marg & Partners (gmp). Explore how world-class multimodal transportation hubs enable seamless global mobility, while also serving as destinations in and of themselves. Renowned for their designs of rail stations, airports, and sports complexes across Europe and Asia, gmp has redefined large-scale infrastructure. Mr. Keyl will highlight Berlin Main Station as an example of how national infrastructure investments helped unify a long-divided country. He will also discuss gmp's work in China, and advancements that can inspire the future of intermodal travel in the U.S. Join us to help shape the future of mobility!
