MTI Research Snaps presents

# Will Ride-Hailing Enhance Mobility for Older Adults?

Register at

<https://tinyurl.com/rideshare12>

This study explored the potential for ride-hailing services like Lyft and Uber to help meet the travel needs of older Californians. Using data from a survey of almost 3,000 Californians 55 and over, we analyzed how many older Californians have used ride-hailing, how they booked trips, what concerns they have about ride-hailing services, and their interest in potential new options for how to book and pay for trips.
